Education

M.S. in Information Networks, Aalto University

2024 - 2026

- Specialization: Digital Ethics, Society and Policy
- Minor: Information Design

B.S. in Engineering with Computing, Franklin W. Olin College of Engineering

2019 - 2023

- GPA: 3.92 / 4.00
- Courses: Data Science, Software Systems, Collaborative Design, Modeling and Simulation
- Achievements: Olin Half Tuition Merit Scholarship, National Merit Scholarship, Clare Boothe Luce Research Award, Public Interest Technology Fellowship, Amazon SURE Fellowship

Professional Experience

Demos Helsinki - Junior Expert - Helsinki, Finland

04/2025 - 09/2025

- Worked at the intersection of technology and social sciences to develop materials and an interactive React website for a technology ethics mentorship program (ARISE Horizon Europe project)
- Focusing on impact creation and outreach, conducted reviews of AI policy and development landscape (FORSEE Horizon Europe project)
- Contributed to proposal writing for Horizon Europe and public consultation calls

Columbia University - Research Assistant - New York, NY

06/2023 - 08/2023

- Worked with Mobile X lab to develop Deepfake detection solution based on real time scene authentication
- Developed Python infrastructure to analyze facial landmark data generated from Google's Mediapipe library
- Created visualizations and data processing pipelines using Matplotlib, Numpy, and Pandas libraries

HP - Firmware Engineering Intern - Spring, TX

05/2022 - 08/2022

- Worked with Core BIOS team to develop Python tool that scraped BIOS build logs for key insights and displayed data visualizations in interactive dashboard
- Integrated tool into team's workflow to save an estimated 1000+ hours of development time annually

Franklin W. Olin College of Engineering - Undergraduate Researcher - Needham, MA

05/2020 - 05/2021

- Designed a fluorescence based optical circuit to determine chlorophyll concentration in water samples
- Applied digital and electrical filtering techniques to optimize signal analysis pipeline, built on Raspberry Pi
- Prototyped system to be used on moored profilers for early algae bloom detection in aquaculture farms

Projects

Air Partners - Student Project Manager - Roxbury, MA

2022 - 2023

- Worked with community partners to advance data driven environmental justice advocacy work
- Installed HEPA purifiers at 30+ residences and quantified their effectiveness at mitigating PM2.5 and PM10 indoor air pollution

Public Interest Technology (PInT) - Project Manager, Member - Needham, MA

2019 - 2022

- Helped establish and grow PInT into a 25+ student organization
- Designed workshops and hands on project experience to encourage engineering students to engage with the social and ethical implications of technology development

Skills

- **Software:** Python, Full stack development, React, JavaScript, D3, Git, Java, R, Matlab
- **Design & Media:** Adobe Suite, Figma, UI/UX, Da Vinci, Photography
- **Languages:** Mandarin Chinese, English
